When Castelli engineered the first aero jersey for road racing back in 2006, everyone thought we were crazy. Back then, aero was only for TTs. Performance clothing meant moisture management. And you could win the Tour de France with a baggy jersey that was little more than a polyester T-shirt. Even our aerodynamic consultants expected limited gains, so we named the jersey Split Second, though, like now, we thought even small gains were worth pursuing. In the end the gains were pretty substantial, and we completely revolutionized the look of the pro peloton.

We're now on the sixth major revision of our aero jersey. Each generation has become more aero and better fitting. The Aero Race 6.0 benefits heavily from CFD analysis of wake flow in the riding position for fabric and seam placement. It also benefits from Team Ineos riders' feedback, as we've worked to make the jersey comfortable for their long hours of training and then racing in every possible weather condition.

Version 6.0 is our most aero and most comfortable Aero Race Jersey yet. But we're already at work on 6.1...

METICULOUS EVOLUTION

The Free Aero Race 4 Bibshort is our top race short, which also means that it's insanely comfortable even if you never pin on a number.

The original Free Aero Race Bibshort was first introduced over a decade ago and has logged literally millions of kilometers under the backsides of our sponsored pro riders and has been the best-selling short both in the Castelli retail collection and in our Servizio Corse custom program. Over this time the short has undergone numerous updates and improvements in the never-ending quest to create the best short we can make. While the basic concept of a minimalist workhorse pro-level comfortable race short remains, every single fabric, component, stitch and construction method has been updated and improved over time. The fourth major generation of the short features the updated Progetto X2 Air Seamless seat pad. This pad separates a soft, stretchy skin care layer that moves with your body from a generously padded cushioning layer that replicates the form of your saddle. Eight-hour rides are no problem.

Of course the fabrics are premium, made to our specifications by Italy's best fabric suppliers. The Forza fabric on the inner leg features 38% Lycra® content for perfect fit, while the Vortex fabric on the side panels is dimpled for aerodynamics. And it's held in place by the latest iteration of our seamless flat Giro leg gripper.

THE THRILL OF COMPETITION

We made this short to incorporate as much technology as possible from our top-of-the-line pro-level race shorts at a more accessible price. And although it's certainly capable of weekend racing, it's also a great comfort performance short even if you never pin on a number.

The main Vortex textured fabric and the Giro4 leg gripper come straight from our top Free Aero Race 4 Bibshort, while the KISS Air2 seat pad has most of the comfort of our top seat pad but represents maximum value. The intangible part that you'll appreciate most is our knack for building in perfect fit, thanks to the Castelli pattern engineering team.

This is the short that brings the best of Castelli's know-how in building comfort performance shorts into an accessible product in your cycling wardrobe.

WHAT IT IS

The Idro 2 Jacket provides 100% rain and wind protection with best-in-class breathability in the smallest package we can make. Even more compactible than the Idro Pro, this Idro jacket is made as small as possible so you always have it with you.

WHEATHER CONDITIONS

- PRODUCT FEATURES**
- The lightest Castelli GORE-TEX® Product ever made
 - Durably waterproof and long-lasting weather protection backed by the GUARANTEED TO KEEP YOU DRY™ promise
 - GORE-TEX® SHAKEDRY™ product technology
 - Folds into just half a pocket
 - YKK® waterproof Vislon® zipper
 - Anatomic wrist closure
 - Reflective Castelli wordmark
 - 319,99 USD

THE SMALLEST, LIGHTEST GORE-TEX® JACKET

This jacket can change the way you ride. It's so small you'll find yourself stuffing it in your pocket for rides with even a remote chance of rain, just because it takes up so little space. And you'll be extending your rides into conditions when rain is in the forecast because you know you'll be perfectly covered. Using Gore's newest SHAKEDRY™ two-layer fabric, we constructed the most minimalistic jacket that still covers your needs. It fits over your jersey and vest. It covers your tail. It has a tall collar. It has a YKK® Vislon® waterproof zipper. It has reflectivity. But that's about it. Compared to the Idro Pro jacket, this one is made to go in your pocket for every ride, yet still provide the essential protection when called into duty.

PERFETTO RoS LONG SLEEVE	4039085

WHAT IT IS

The long-sleeve Gabba is one of our most versatile pieces. 100% wind protection with GORE-TEX INFINIUM™ WINDSTOPPER® water protection and best-in-class breathability. With a light base layer it's good for mild temperatures, or with a thermal layer you can ride it below freezing. If you have just one jacket in your cycling wardrobe, this should be it.

IF YOU HAD JUST ONE JACKET

The Perfetto RoS is the one jacket that does everything well. We initially designed it as a cool-weather training and extreme-weather race piece for our pro riders, but in reality it excels in many conditions thanks to its full wind protection, great fit through stretchy fabrics, and best-in-class breathability. The current version represents the biggest performance upgrade in the four generations of this jacket. RoS in the name signifies Rain or Shine. The emphasis should be on dry-weather comfort, which is where this jacket really excels, but then you get near waterproof protection if you do get caught in the rain. We worked with Gore to develop two new Castelli exclusive GORE-TEX INFINIUM™ WINDSTOPPER® fabrics. We use a light fleece-lined waterresistant version on the forward-facing surfaces and a lighter, stretchier fabric on the back that maintains the breathability of the previous fabric while improving water repellency at the same time. The Perfetto RoS is that ideal weight: no built-in insulation so you can layer over a light base layer for moderate conditions. Or you can add a thermal jersey underneath and take it to very cold conditions. You decide.

HOW COME NO ONE EVER MADE A BETTER GABBA?

In 2010 Castelli introduced the Gabba to the pros and changed the way pros race in the rain. And cold. And ride in training. Every other performance cyclist soon saw the need for a Gabba in his or her wardrobe. We've made some minor updates along the way, but for the fourth-generation Gabba we started with a clean slate to make a significant upgrade. That involved moving it to near waterproof levels, which meant developing a new exclusive GORE-TEX INFINIUM™ WINDSTOPPER® fabric. We made the front-facing fabric warmer with a light brushing, while the rear-facing fabrics are lighter yet more water repellent than the previous Gabba. We made it better in the rain through seam sealing on the shoulders and a covered zipper. Based on Team Ineos testing we figured it's better to have two pockets that are easier to access with gloved hands, though we provide an internal sleeve to keep your pump or other items from moving around. It's not easy to make a better Gabba. We'll keep trying.

LIGHT BLACK

LIGHTER, MORE PACKABLE, MORE BREATHABLE

The Perfetto Light started life as a request from our pro riders: “I want to wear the Gabba all the time, but sometimes it’s too hot.” So a somewhat lighter and more breathable Gabba became the Perfetto Light.

The Perfetto Light is improved in nearly every way: it’s now lighter, with thinner fabrics on the front and back, which make it easier to stuff in a pocket. It has both better rain protection and improved breathability. It has two larger pockets that better complement the three pockets on the jersey you wear underneath this jacket.

The new Perfetto Light is closer to a Perfetto Vest with sleeves, which makes it perfect for your spring and fall training and racing in cool conditions.

PERFETTO VEST IS NOW EVEN MORE PERFECT

The Perfetto Vest has been a favorite with everyone from our pro riders to Castelli staff to performance cyclists everywhere. But we wanted to make it even more perfect, so we developed a new exclusive GORE-TEX INFINIUM™ WINDSTOPPER® fabric that is both lighter and more water repellent than the old fabric while maintaining the stretch and breathability. We matched it up with better water repellency in the back while maintaining the breathability, and further improved details like the back pockets and reflectivity. A more perfect Perfetto Vest.

A BETTER
ARM WARMER

With Team Ineos we set out to make a better seamless arm warmer. Others on the market are made with a nylon/Lycra® blend that tends to hold moisture, but we knew we could get better moisture management with a polyester yarn. Working with polyester makes it more difficult to get the right stretch, return and manufacturing consistency, though. It took a year longer than we thought, but we’re all glad we stuck with it. These warmers are a pro rider favorite because they’re crazy light and they’re extremely warm for their weight, yet even in milder conditions you don’t overheat. They’re so stretchy you hardly feel them on, yet when you take them off they occupy a fraction of the space that normal warmers would take in your pocket.

UNBELIEVABLY
LIGHT

A jacket that weighs less than a jersey? Real Gore-Tex®, no less? And it packs up to fit in half a jersey pocket? And it's the most breathable Gore-Tex® ever? Hard to believe, but it's all true. This jacket is a game changer. It's fully waterproof, as you expect from Gore-Tex®, but with its exceptional breathability and packability you'll find that it replaces all your other shell jackets. If your ride has the slightest chance of rain or a long descent or the possibility of temperatures dropping, this jacket will automatically go in your pocket. You can confidently do longer rides in conditions that you would have avoided with all your old jackets. While you can get this fabric from other brands, you can't get the Castelli fit, design and construction.

CASTELLI PADS

PROGETTO X² SEAMLESS

0 1. SKIN CARE LAYER

The Progetto X² Air Seamless seat pad is used to protect your skin while providing just the right level of padding for maximum comfort, no matter how long your epic ride is.

0 2. SEAMLESS INTEGRATED TECHNOLOGY CUSHIONING LAYER

A separate component provides no-compromise cushioning, with Castelli's infinitely variable thickness to bring the right shape to the right part of the body: thicker under the sit bones and thinner on the sides and under the perineum.

0 3. VISCIOUS COMFORT INSERTS

Perforated viscous padding is added under the highly sensitive ischial and perineum pressure areas.

KISS air²

0 1. SEAMLESS SKIN CARE LAYER

The softest-ever fabric next to your skin for immediate and long-lasting comfort. Seamlessly engineered to reduce chafing and abrasion. Stretchy to move with you.

0 2. DUAL DENSITY, INFINITELY VARIABLE THICKNESS

Dual-density infinitely variable thickness gives you the perfect cushioning in every part of the pad. Maximum thickness and density in the ischial zone, tapering to moderate thickness under the perineum and minimum thickness at the perimeter.

0 3. ANATOMICAL SHAPE

Comfort is further enhanced by the creation of a perfect interface to your body during every pedal stroke.

NANO FLEX FABRICS

NANO FLEX XTRA DRY

NANO FLEX XTRA DRY

The double face base fabric gives maximum warmth, maximum water repellency, and low air permeability to keep the wind out. Not as stretchy as Nano Flex 3G for a compressive fit. Castelli's Nano Flex treatment comprises a topical nanotechnology microfilament mechanical water repellent finish combined with a short chain chemical DWR finish for class leading water repellency.

NANO FLEX 3 G

NANO FLEX 3 G

Castelli's Nano Flex treatment comprises a topical nanotechnology microfilament mechanical water repellent finish combined with a short chain chemical DWR finish for class leading water repellency. The proprietary 3rd generation of Nano Flex fabric is based on a new thermal fabric with a tighter knit for improved water protection. More comfortable, warmer, softer, drier and stretchier.
